

## Active and Healthy Ageing in GM Today's Exhibitors

### Care Innovation

Care Innovation is a company founded by people who share a vision that 'Care technology should suit the least able and benefit all'. The team has decades of experience creating and delivering innovative solutions for integrated health and social care, assistive services and housing. Working with the latest mobile, Internet of Things and consumer digital technologies, Care Innovation delivers significant value for money to its customers and their service users, carers, and health and care professionals across the UK and international markets.

### Edward Healthcare

The goal is to bring together the best of global health care practice, research, education, investment and innovation to address some of the most pressing needs in the sector. Through experience in ownership and management of elder care facilities and international investment in research, Edward Healthcare aims to be at the forefront of future healthcare development.

The health care group owns and operates retirement and elder care facilities in China, and also provides education and training designed to meet the needs of China's rapidly growing elderly population. Their close ties with Chinese healthcare organisations ideally positions them to help tackle problems associated with ageing populations across different cultures.

Edward Healthcare in the UK operates a research centre in Manchester in cooperation with Manchester Academic Health Science Centre (MAHSC) to promote best practice in health and elder care.
